## Endpoint Security

## What level of Windows User Account Control (UAC) must be enabled for Coro to enforce a UAC Notification Missing policy?

Coro enforces the UAC Notification Missing policy when Windows User Account Control settings are set to:

- Default
- Low
- Medium

User Account Control Settings	_	×
Choose when to be notified about changes to your computer		
User Account Control helps prevent potentially harmful programs from making changes to Tell me more about User Account Control settings	your computer.	
Always notify		
<ul> <li>Notify me only when apps try to make changes to my computer (default)</li> </ul>		
Don't notify me when I make changes to Windows settings		
Recommended if you use familiar apps and visit familiar websites.		
Never notify		
Фок	Cancel	

For more information, see **UAC Notification**.
