Network

Is the Network module included in any bundles?

The Network module and all associated add-ons are part of the following bundles:

- **SASE**

- **SASE Managed**

Is the Network module enabled by default?

No. The Network module is not enabled by default, and needs to be enabled either by a Coro employee or an MSP.

Is the Network module covered under the Coro SOC 2 type 2 report?

Coro SOC 2 Type 2 compliance is at the company level, and covers all modules, including Network.
