

Managing SOC remediation

Managing remediation issues

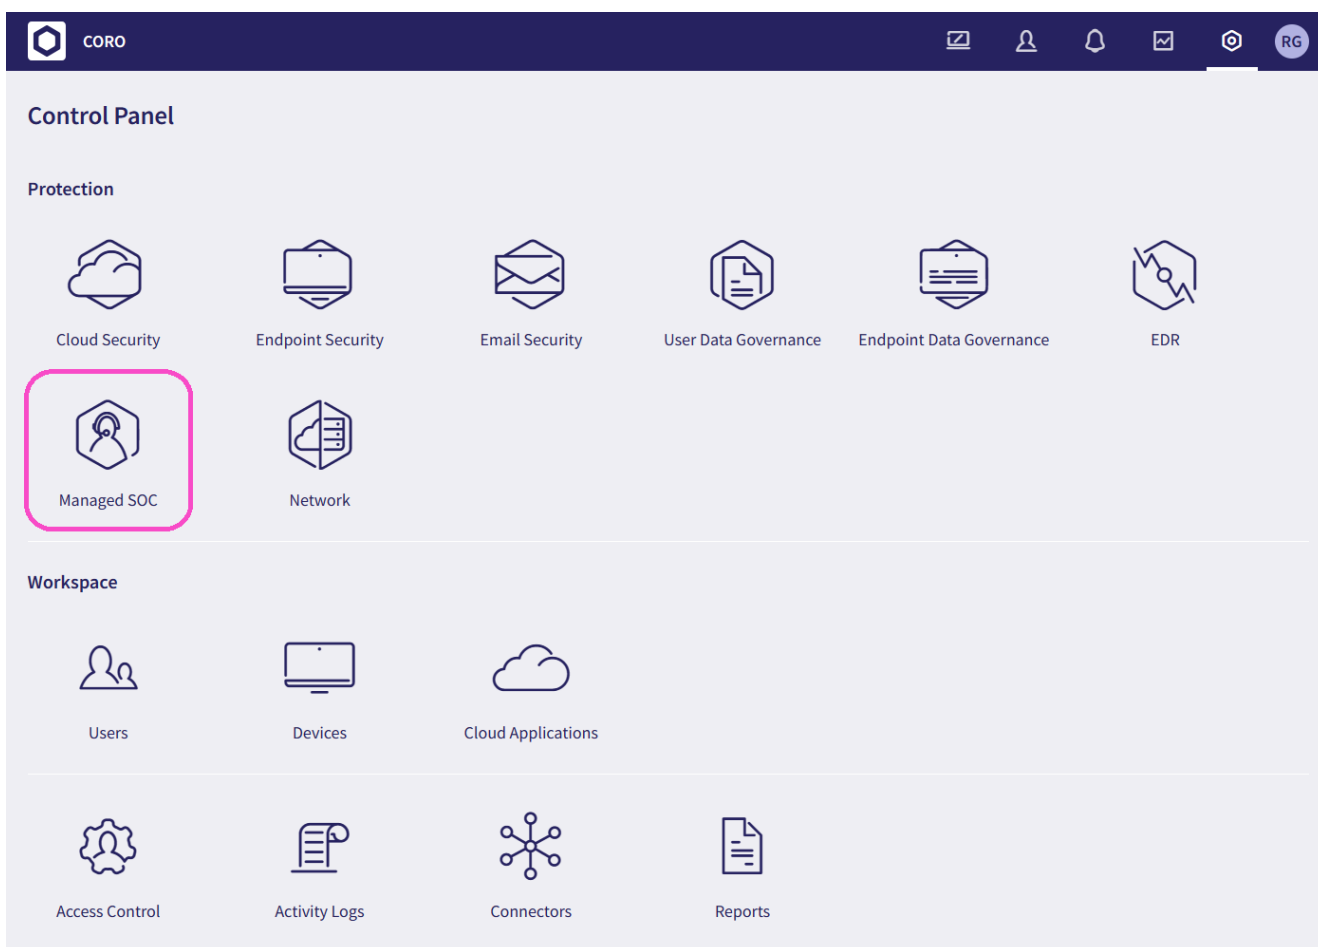

Admin users with sufficient permissions can choose how to manage remediation. SOC contacts can be notified by Coro according to their specified notification level and remediate issues themselves, or Coro can remediate issues for you and update SOC contacts about any actions taken according to their specified notification level.

To manage remediation issues:

1. **Sign into the Coro console** and select **Control Panel** from the toolbar:

2. Under **Protection**, select **Managed SOC**:

3. Select the **Remediation** tab:
