## Managing SOC remediation

## Managing remediation issues

Admin users with sufficient permissions can choose how to manage remediation. SOC contacts can be notified by Coro according to their specified notification level and remediate issues themselves, or Coro can remediate issues for you and update SOC contacts about any actions taken according to their specified notification level.

To manage remediation issues:

## 1. Sign into the Coro console and select Control Panel from the toolbar:

2. Under **Protection**, select **Managed SOC**:

Сого					ম	٥	~	0	RG
Control Panel									
Protection									
$\bigcirc$						ĺ	(Jan)		
Cloud Security	Endpoint Security	Email Security	User Data Governance	Endpoint Data Gove	rnance		EDR		
8									
Managed SOC	Network								
Workspace									
Ra		$\bigcirc$							
Users	Devices	Cloud Applications							
ŝ	Ē	Š							
Access Control	Activity Logs	Connectors	Reports						

3. Select the **Remediation** tab:
