

SIEM connector actions

Each Security Information and Event Management (SIEM) connection has the following set of available actions:

- **Edit**
- **Delete**
- **Sync**

Note

Child workspace clients are not able to perform actions on a connector.

Edit

The **Edit** action allows you to edit an existing SIEM connection. When selected, the **Edit connector** dialog is displayed:

Edit connector [Close]

Name: [Blurred]

Format: Splunk [Dropdown]

Listener URL: [Blurred]

HTTP and HTTPS supported

Header	Value
Authorization	[Blurred]

+ Header

Apply to all customers

CANCEL SAVE

You can perform the following from the **Edit connector** dialog:

- Edit the **Name**, **Listener URL**, and Authorization token **value**.
- Add additional HTTP/HTTPS headers to the connection by selecting **+ Header**.
