

Uninstalling the Coro Agent

To uninstall the Coro Agent, follow the instructions for your device operating system:

- **Windows devices**
- **macOS devices**

Uninstalling Windows devices

To uninstall the Coro Agent from your Windows device:

1. Disable **Tamper Protection** for your workspace.
2. On your Windows device, open the **Settings** app.
3. Select **Apps > Installed Apps** (Windows 11) or **Apps > Apps & features** (Windows 10).

Note

For older Windows devices, use **Control Panel > Programs > Uninstall a program**.

4. Locate Coro within the installed apps list.
5. Select Coro and choose **Uninstall** from the menu to remove it.

Note

Remember to re-enable tamper protection for your workspace after all devices have been uninstalled.

Uninstalling macOS devices

To uninstall the Coro Agent from your macOS device:

1. Disable **Tamper Protection** for your workspace.
2. Obtain the Coro Uninstallation tool for macOS devices. Contact **Coro Support** for details.
3. Run `CoroUninstaller.pkg` and follow the instructions provided. The uninstaller handles closure of the application and removal from your system automatically.
4. Reboot your device.
