

GDPR

Summary

Regulation: General Data Protection Regulation

Abbreviation: GDPR

Governs these parties: all organizations which target or collect personal data related to European Union residents

Enforced by: the European Commission, works with each EU Member State, and designates an independent public authority

Details

The General Data Protection Regulation (GDPR) govern businesses to protect not only their customer's data but also their systems from any potential attacks, with stricter rules surrounding the handling of personal data. As a result, businesses must take extra care to ensure that they are compliant with these regulations.

In order to comply with the GDPR each organization processes personal data (collecting, structuring, organizing, using, storing, sharing, disclosing, erasing, and destruction of data), and must ensure that the personal data it uses fulfills the requirements of the regulation.

The rest of this document is designed to help our community understand GDPR better by outlining the following information.

- **How it Relates to Cybersecurity**
- **How Coro Handles Compliance for You**

How it Relates to Cybersecurity

Internal policies and clear procedures for data management are required to secure data and ensure its integrity, access, use, and security. The cybersecurity policy describes the organization's overall security expectations, and roles. The stakeholders include outside consultants, IT staff, financial staff, etc.

How Coro Handles Compliance for You

At Coro, we've done the research thoroughly and regularly track updates to the regulation in order to ensure that you are implementing best practices in the areas we cover when we're protecting your systems.
