

# Control panel

## Accessing the control panel

The **Control Panel** enables you to configure protection settings for your subscribed security modules and add-ons. The Control Panel is also where you administer your workspace, cloud applications, protected users, and their devices.

To access the Control Panel, **log into the Coro console** and select the *Control Panel* icon in the toolbar:

In addition, each dashboard panel (and optional module or add-on) in the Actionboard includes a *Control panel* icon, designed to allow you to quickly access the relevant settings page:
