# Email Security

Coro scans emails for threats such as phishing, malware, and ransomware, and automatically remediates identified threats. A summary of email activity is shown in the **Email Security** dashboard panel:

> **Note**
>
> Select the icon in the top-right of the panel to access the **Email Security** configuration page.

The **left pane** shows:

• The total number of emails processed in the last 90 days.

• A list of suspicious domains ranked by the number of detections, in descending order.
