

Product Documentation

This documentation provides a comprehensive set of user guides and reference materials for Coro users:

- **Coro and cyber attack protection**

Introduces how Coro can provide protection for security risks faced by organizations.

- **Coro platform overview**

Provides an overview of the Coro platform and descriptions of the terms used.

- **Using the Coro console**

Describes how to manage your Coro subscription through the web-based console and how each section of the **Actionboard** works.

- **Ticket types**

Includes complete listings of all Coro ticket types, by protection module

- **Cloud security**

Provides details on how Coro protects your cloud applications.

- **Email security**

Provides details on how Coro identifies and protects against email based threats, such as phishing.

- **Endpoint security**

Provides details on how Coro protects and monitors endpoint devices.

- **EDR**

Endpoint Detection and Response (EDR) focuses on detecting and responding to advanced threats targeting endpoint devices.

- **Endpoint data governance**

Describes how to configure Coro to monitor endpoint device drives for sensitive data.

- **User data governance**

Describes how Coro helps you stay compliant with data governance regulations.

- **Network**

Coro's Network module enables organizations to configure a cloud based virtual office network, providing protection against external and internal attacks.

- **Mobile Device Management**

Coro's Mobile Device Management (MDM) module enables you to manage iOS and Android mobile devices for end users across your organization.
