Processes

The **Processes** page provides an aggregated view of collected information on processes that were executed within the organization, allowing users to quickly drill down into a process. The interface provides searching and sorting for locating processes efficiently.

> **Note**
>
> If a device loses network connectivity or the Coro Agent is inactive, Coro EDR preserves your process data. This saved data becomes accessible once the device re-establishes connection or the Coro Agent resumes operation.

The following topics are discussed:

- **Accessing the Processes page**
- **Types of process information**
- **Sorting of process information**
- **Process actions**
- **Searching process information**

Accessing the Processes page

To access the **Processes** page:

1. **Log into the Coro console** and select **Control Panel** from the toolbar:

2. Select **EDR**:
