

Deploying Coro to Windows devices with Microsoft Intune

This guide describes how to deploy the Coro Agent to your Windows endpoints through the Microsoft Intune endpoint management platform.

To successfully deploy Coro to Windows endpoints via Intune, you need to:

1. **Download Coro Agent and the Microsoft Win32 Content Prep Tool**
2. **Package Coro as an Intune file**
3. **Create the deployment in Intune**

Download Coro Agent and the Microsoft Win32 Content Prep Tool

Perform the following steps:

1. Log into your Workspace on the Coro Console. Navigate to **Control Panel > Devices > Agent Deployment** and locate the latest version of the Windows agent from the list of available versions. From the **Actions** menu, select **Download** to download a copy of the agent .MSI file to your local device.
