

v3.0

Version 3.0, a major release including several major changes, includes:

- **New features**
- **Enhancements**
- **Fixed items**
- **Agent updates**

Prerequisites

Before you can use the features and enhancements described below, you must update the relevant agent on your device. *macOS/Windows* agents 3.0 will be available on October 29, 2023.

New features

This section describes the new 3.0 modular security Coro platform that we are releasing with version 3.0.

Modular overview

The new 3.0 modular security Coro platform enables mixing and matching modules that snap easily into our platform and always work together, communicating via the same AI engine, regardless of how many of those components are implemented. This modular security Coro platform allows you to:

- Pick and choose the security components (modules and associated add-ons) you need
- Ensure compliance with the regulations you're obligated to

The following video provides an overview of the modular security Coro platform:

The following table summarizes the changes made to the location of specific settings in the Coro 3.0 modular security platform.
