

v1.9

Coro version 1.9 provides new features, enhancements, and fixes:

New features

This section describes the new features that we're releasing with version 1.9.

Data governance logic updated

We have updated the way our logic and code run, which is designed to significantly improve the quality of protection, and overall performance.

NPI & data governance

In support of the **GLBA** regulations, **Coro** now supports data governance and data loss protection for sensitive data classified as nonpublic personal information (NPI).

Configuration

Administrators with permissions to do so can manage NPI configuration, and related granular administrator permissions configurations from the **Coro Console** in the **Control Panel**.

By default, **Coro Console** is configured to monitor cloud apps, emails and devices for NPI from the **Monitoring** tab in the **Control Panel**:
