v2.0

Version 2.0 provides new features, existing feature enhancements, and fixes.
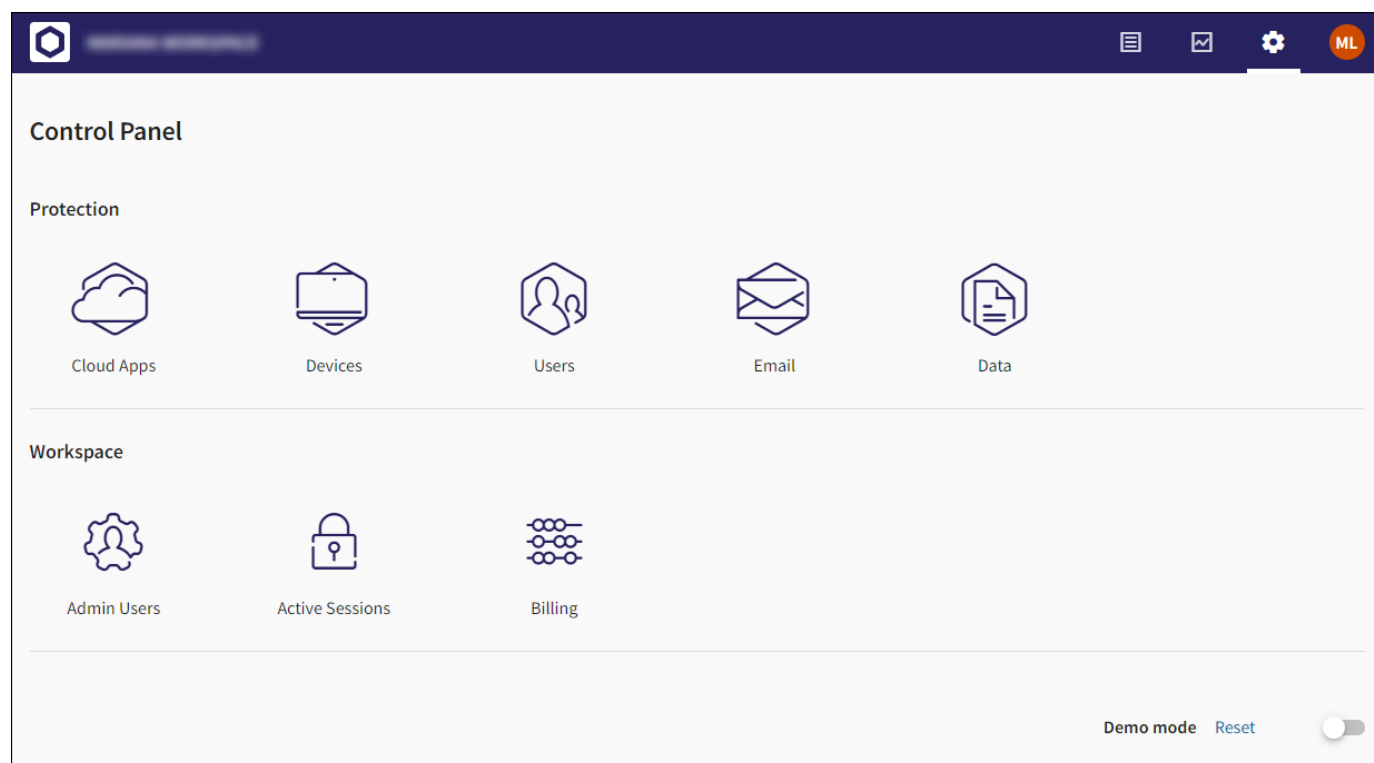

New features

This section describes the following new features that we are releasing with version 2.0:

- **Restructured control panel**
- **Data permissions extended to custom data types**
- **Synchronize users from cloud apps button**
- **Data governance actions available directly from data tickets**
- **Excluding outgoing email scans by keyword in subject line**

1 - Restructured control panel

The **Control Panel** has been restructured as follows:

The **Protection** area (previously **Protection Coverage**) now contains the following sections:
