

Exclusions

The **Exclusions** tab allows you to exclude emails from sensitive data scans where the subject line includes specified keywords:

The screenshot shows a web interface for 'User Data Governance'. At the top, there's a 'Control Panel' breadcrumb. Below it, the 'User Data Governance' section has three tabs: 'Monitoring', 'Permissions', and 'Exclusions' (which is highlighted with a pink box). Under the 'Exclusions' tab, there's a heading 'Configure data that should be excluded from scans for sensitive data'. Below this heading is a checkbox labeled 'Exclude emails with specified keywords in the subject line', which is checked. Underneath the checkbox is a text input field with the placeholder text 'Enter keywords like "keyword1", "keyword2"'.

Enter each keyword into the textbox:

Two input fields are shown, each with a 'Random keyword' button and a close 'X' icon. The first field is labeled 'Random keyword 1' and the second is labeled 'Random keyword 2'.

To include the keywords from email subjects, enable the **Exclude emails with specified keywords in the subject line** option.

A checkbox is shown, which is checked, with the label 'Exclude emails with specified keywords in the subject line'.

Warning

The exclusion functionality does not prevent sensitive data from being sent.
